Dear Recruitment Team,

I'm eagerly writing this letter to express my interest in your posting of **Quality Assurance Engineer** position at **Staffbase** since I have a strong experience in QA automation engineer.

After graduating from college, started my career life as Test Analyst in **2012** and currently I have become an experienced and responsible **Senior QA Engineer** at **CHECK24**. My 9+ years has made me an expert in Software Testing both as an individual and energetic team player. During this tenure, I have collaborated with key **stakeholders** enabling me to learn **international exposure** and **cross-cultural** work pattern.

My own interests and involvement towards learning new technical skills have reached me in this position. I'm equipped with **ISTQB certification**, started my QA career as **Functional** Manual tester which includes **Exploratory, UAT, Regression, Contract** and **End-To-End** testing, **Requirement Analysis, Test Plan, Test strategy, Test Design**, Test Execution and Test Sign-Off in **Agile methodology**. Later, I got an opportunity to Automate Regression test cases with **HP UFT tool** using **VBScript** language. I started looking for other Automation tools. Luckily, I was mapped to test automation project with **Selenium WebDriver** using both **Core Java** and **Python**. My experience gets stronger as now I'm developing test scripts for **Frontend, Backend Database** and **Rest API** services Testing using **Playwright, SQL queries** and **Spring Boot WebTestClient** respectively. As a next step, I focused into **Mobile Automation** using **Appium** and **Non-Functional Load testing** using **Apache JMeter** tool. In my QA journey, I am proud to say that I have handled different Programming languages, Automation tools and frameworks, SDLC phases, Development team and Mobile/Web Applications.

I am well equipped with **communication skills, solving-problems**, and **decision-making**. Ability to work independently with **high-quality** Automation deliverables. Right now, I'm looking for the next step in my career growth, technical knowledge, and work environment. I hereby **enclosed my CV**, which details my work experiences history till date.

I welcome the opportunity to speak with you about my qualifications and ways that I can contribute to your organization. I'm looking forward to discussing about the position in detail with you. Thank you for taking time and considering my profile.

Best Regards,
Saleem Samaldeen
